Goals:

To be an influencer of top design and interface creation on applications and software. Continue learning in the web design arena by staying in the know about industry updates, standards, and best practices.

Work Experience:

Radolo — *UX/UI*   2017-Now

Building large and small scale apps for mobile and desktop use. Frontend design for the app layouts and frameworks. Update, Refactoring and redesigning older apps.

Webapps LLC — *UI Designer*   2012-2017

*L*ayout software interfaces for Hitpath and other apps. White label affiliate reporting interfaces for hundreds of clients. Create and maintain websites for our brands. Graphics for marketing and promotional needs ~ printed stickers, mugs, conference displays, event banners, and social media imagery.

Nice Rack — *DJ & Promotions*   2011-Now

Apps and Websites:

Dockett - Refactored the css to less and and did a redesign in Sketch with Material Design Components. https://projects.invisionapp.com/d/main#/projects/prototypes/15776780

Fortress - Wrote the less for this one from scratch and implemented Kendo UI. https://itunes.apple.com/us/app/fortress-hse-pro/id1352732086?mt=8   http://fortresshsepro.com/

Vivi - Wrote the less for this one from scratch and implemented Kendo UI. https://www.medstartr.com/project/detail/200253-Empowering-people-with-diabetes-to-tackle-the-flu

Align - Some css work.   https://application.aligntoday.com/

Better Book Club - Some css work.   https://www.betterbookclub.com/

Hitpath - Created designs for new functionality, white labeling of 100's of sites for affiliate portal, all css, created sprites to speed up load time by 70%, Graphics for marketing and promotional needs, build and maintained multiple websites.   https://www.hitpath.com/
